📖 README

✎

# ctswizards

IoT Sensor:

Features: listens for the gunshot/threat/abusive signatures, to determine if a gunshot/threat/abuse has occurred. Utilizes machine learning analysis to compare sounds detected against thousands of gunshot samples. False alarm sources are virtually eradicated. No data cables necessary. Can operate on high/low voltage power supply.

Security/Privacy: Data Encryption in transit No real time audio is transferred, eliminating privacy concerns.

Integration: Connects to the Monitoring system using wi-fi. Integrates with any monitoring system (manufacturer agnostic) Integrates with access control system to trigger building lockdown to stop spreading the threat. Can integrate with mass notification system
